

Many people enjoy satellite radio, and are happy to pay for the privelege of receiving news, sports, traffic reports, weather, and all kinds of music without having to listewn to commercials as on other radio stations. Please do not be swayed by the National Association of Broadcasters to stop satellite radio (XM and Sirius) from being able to broadcast weather and traffic reports. Please reject the NAB Petition 04-160. This country is founded upon competition and let the public decide where it wishes to hear these reports...not the lobbyists and politicians.
